

SUPPLEMENTAL INSTRUCTIONS FOR DRAIN-PLUG DEICERS

MODEL UPH-15 UNIVERSAL DRAIN-PLUG DEICER INSTALLATION INSTRUCTIONS

1. Remove drain plug assembly/drain plug from outside of tank and save for future use.
2. Route the supply cord and threaded flange from **inside** the tank through the drain plug opening. The attached black rubber washer should be on the inside of the tank.
3. Align the de-icer with the heating element facing upward as shown in picture below. Also take note of UP Arrow on the unit.
4. While holding the deicer in place on the inside of the tank, place the notched out black plastic nut onto the threads of the deicer and hand tighten until snug. Do not over tighten.
