Important Size Notes

If your horse is between sizes, go to the larger size.

If the WIDTH measurement exceeds the LENGTH by more than one size (an extremely short and wide foot) we do not recommend Old Mac's G2's. Old Mac's Originals are more suitable for this hoof shape.

If the LENGTH exceeds the WIDTH by more than one size (a very long and narrow foot), we do not recommend Old Mac's G2's. If the hoof is long and narrow, but fits within the size chart, inserts may be used.

Old Mac's Inserts should ONLY be used:

- If the boot is slightly too wide, and you need a tighter fit
 - For a club foot
 - If one hoof is distinctly smaller than the other
-
