Feeding Directions:

The enclosed scoop will hold 1 ounce of Sho-Hoof®. Feed two scoops to provide 2 ounces. Sho-Hoof® is designed to be fed at the rate of 2 ounces per head per day in addition to the horse's normal daily ration. Top dress 2 ounces of Sho-Hoof® to the horse's grain ration once daily. Because the rate of hoof growth varies among horses by season, it is recommended that Sho-Hoof® be fed as directed for a minimum of 12 weeks before any improvement in hoof quality should be expected.
