Professional Strength

REMISSION

For horses prone to the risk of founder.

REMISSION is a scientific blend of natural supportive ingredients with Probiotics, Functional Carbohydrates (2nd generation Prebiotic) and Omega 3 Fatty Acids.

REMISSION provides:

- Saccharomyces Cerevisiae improves hindgut function by stimulating the natural beneficial bacteria to improve fiber digestibility, phosphorus and calcium uptake (bone development) and hoof condition.
- Contains Magnesium, Chromium, Biotin, Methionine, l-Lysine, Vitamin C, Zinc and Niacin.
- Provides seventy anti-oxidants, Omega-3 and Omega-6 Fatty Acids and all of the other essential Amino Acids.

Lacto-Mos™ with its concentration of live Probiotics (in with the good bugs) supports the beneficial bacteria in the stomach to maintain natural gut health and integrity.

BIO-MOS a Functional Carbohydrate (2nd generation prebiotic) is a unique sugar that can help reduce the low glycemic and low insulin response in foods. Most importantly, Bio-Mos® binds to the disease causing gram negative bacteria (out with the bad bugs) in the horse's gut and carries them harmlessly out through the feces.
