West Nile	West Nile	<b>Equi-Nile™</b> with Havlogen® 	West Nile Innovator	Recombitek

### Havlogen® is Merck Animal Health's exclusive adjuvant.

Our vaccines contain the adjuvant Havlogen® which produces a booster effect stimulating long-lasting protection through the slow release of antigens. It allows concentration of antigen (a substance to which an immune response is mounted) while minimizing adverse reactions. It also stays in suspension and doesn't settle to the bottom of vial for consistency and potency in each dose.

Call your Merck Animal Health representative or distributor sales representative to learn more.
