

Ladies Shoe Size Chart

For shoe sizing accuracy, we recommend printing this document on 8.5"x11" paper at 100% (full size).

TuffRider

WIDE WIDTH ZONE	11					11	WIDE WIDTH ZONE
	10½	_____				10½	
	10	_____				10	
	9½	_____				9½	
	9	_____				9	
	8½	_____				8½	
	8	_____				8	
	7½	_____				7½	
	7	_____				7	
	6½	_____				6½	
6					6		
RIGHT INSTEP LINE						LEFT INSTEP LINE	

To Assemble

1. Cut off the top of the second page by cutting along the solid line at the top of the heel.
2. Line up the top of the second page, which has been cut, with the bottom of the size chart on the first page.
3. Tape the second page to the first, taking care to ensure it is evenly lined up.

How to Find Your Shoe Size

1. Place your heel along the solid line at the base of the chart.
2. Make sure your weight is on the foot being measured and your toes are relaxed.
3. Determine the correct size based on the line that touches your longest toe.
4. If the line that touches your longest toe is one of the shorter lines, you should order a half size.
5. Tip! Measure both your feet. One is often larger than the other. If each foot different size you should purchase the larger size.

How to Find Your Width

1. Align your instep, which is the center of your foot, with the solid instep line on the chart.
2. If the outside of your foot reaches the wide width zone, consider purchasing a wide width shoe when available.
3. Again, be sure to measure both feet since one tends to be larger than the other.
