Pinnacle® I.N.

Zoetis

Streptococcus Equi Vaccine

Live Culture

FOR INTRANASAL USE ONLY. DO NOT ADMINISTER BY ANY ROUTE OTHER THAN INTRANASAL.

For the vaccination of healthy horses 9 months of age or older as an aid in the prevention of disease caused by *Streptococcus equi*.

DOSE: Aseptically rehydrate with the entire contents of the accompanying sterile diluent. Instill the entire rehydrated vaccine into one nostril using a syringe with applicator tip. Administer a second dose 2 to 3 weeks later. Annual revaccination is recommended.

CAUTION: This product contains live bacteria and is designed for intranasal use only. Disinfect hands and equipment after use. Contamination of the user's hands or equipment with reconstituted vaccine could lead to infections if proper disinfection practices are not followed prior to procedures that require asepsis. Injection equipment used to reconstitute or administer Pinnacle I.N. should not be reused, and should be disposed of appropriately. In case of anaphylactoid reaction, administer epinephrine. After administration a small number of horses may experience noncontagious transitory upper respiratory signs including nasal discharge and lymphadenectasis. Purpura hemorrhagica may be seen in hypersensitive individuals following exposure to streptococcal proteins. Store in the dark at 2° to 7°C (35° to 45°F). AVOID FREEZING. Shake well after rehydration. Do not vaccinate within 30 days before slaughter. Use entire contents when first opened. Burn container and all unused contents.

For Veterinary Use Only

CAUTION: In the absence of a veterinarian-client-patient relationship, Federal law prohibits the relabeling, repackaging, or reuse of the individual contents of this package. (9 CFR Part 112.6)
