

HOOF AID™

Hoof Care Supplement for Maintaining and Restoring Equine

Profile

Hoof Aid™ is a pelleted hoof supplement for horses. University research has demonstrated that sound hoof growth requires several key nutrients, including zinc, biotin and methionine. In addition to these nutrients, hoof growth also requires quality protein, fat and a host of minerals including copper, selenium and manganese. Hoof Aid contains these essential ingredients in the proportions to support hoof growth per research studies. In addition, Hoof Aid combines these ingredients in a highly palatable, oatmeal based micro-pellet that is easily added to the diet. With highly bioavailable trace minerals and the addition of a yeast culture to enhance digestibility, Hoof Aid ensures proper utilization of these beneficial ingredients.

Guaranteed Analysis

Crude Protein, Minimum.....	24.0%
Methionine, Minimum.....	10.5%
Crude Fat, Minimum.....	10.0%
Crude Fiber, Maximum.....	2.5%
Calcium, Minimum.....	0.75%
Calcium, Maximum.....	1.25%
Copper, Minimum.....	1900 ppm
Selenium, Minimum.....	18 ppm
Zinc, Minimum.....	5300 ppm
Manganese, Minimum.....	1600 ppm
Biotin, Minimum.....	700 ppm

Features

Benefits

Key ingredients (Biotin, zinc, methionine, copper, selenium, manganese, along with protein and fat)	Hoof Growth
University researched	Demonstrates hoof restoration from key ingredients
Oatmeal based, micro-pellet	Prevents sorting of ingredients while maximizing palatability
Mineral chelates and yeast culture	Enhances absorption utilization

Ingredients

Oatmeal, Soybean Meal, Vegetable Oil, Lecithin, D,L-Methionine, Zinc Methionine, Copper Proteinate, D-Biotin, Manganese Proteinate, Calcium Carbonate, L-Lysine, Selenium Yeast, Yeast Culture, Artificial Flavor and Propionic Acid (As a Preservative).

Each Ounce of Hoof Aid Provides

D-Biotin.....	20 mg/oz
D,L-Methionine.....	3000 mg/oz
Zinc.....	150 mg/oz
Copper.....	50 mg/oz
Manganese.....	45 mg/oz
Selenium.....	0.5 mg/oz

Feeding Instructions

(based on 1,000 lb body weight):

Hoof Aid™ provides the building blocks to help correct nutrient deficiencies that contribute to dry hair coats and poor hoof quality. Feed Hoof Aid at 1 oz per day. If hooves are in poor condition, feed 2 oz per day for 30 days before returning to the normal 1 oz per day.

Providing Nutritional Expertise available Monday–Friday from 8AM–5PM (CST) by calling 866-894-3660.
